” China’s shadowy colossus To grasp how a Beijing startup is poised to challenge the likes of Google, Nvidia, and AMD in the deep learning arms race, it’s essential to understand Bitmain’s pivotal role in the \$70 billion bitcoin economy.. Bitmain co-founder Micree Zhan explaining the significance of the word “Sophon.. He had already designed custom chips for the company he co-founded, Bitmain, that had made it into the world’s leading bitcoin miner, allowing it to dominate the new, hyper-competitive industry of unearthing bitcoins.

The Sophon unit will include Bitmain’s first piece of bespoke silicon for a revolutionary AI technology.. It’s capable of causing strange phenomena—such as inscribing flashing words on the retinas of elite scientists.. The aliens use it to take over Earth when their own planet is destroyed by the chaotic gravitational forces of its three suns.

Two years ago, a Chinese chip-design expert named Micree Zhan was reading China's seminal science-fiction novel, *The Three-Body Problem*, by Liu Cixin, while wrestling with how to create a new processor.. Now he needed a chip that could launch Bitmain onto a new trajectory, one that would help it master a world-altering technology called deep learning, a branch of artificial intelligence.. Bitmain may now be the most influential company in the bitcoin economy by virtue of the sheer amount of processing power, or hash rate, that it controls.. It also operates the machines for its own account, that it rents out on contract to others, and, finally, manages several of the world's largest mining "pools"—agglomerations of processing power so huge that they greatly improve the odds of successfully mining a bitcoin block.. "This will invigorate the hardware field," he says "We are about to see the emergence of all kinds of ASICs clouds, and the bitcoin hardware community has demonstrated that under the right conditions this can happen rapidly as a grassroots effort.. While performing his nightly meditation, a practice he has kept up for nearly a decade, it suddenly came to Zhan.. " (Quartz/Zheping Huang) The company is a marvel of vertical integration Bitmain designs the silicon that goes into its bitcoin mining rigs, assembles the machines, then sells them to customers around the world. 34bbb28f04 [Ralink 5370 Linux Driver Download](#)
